EDUCATION

UNIVERSITY OF DENVER FULL-STACK CODING BOOTCAMP
Nov 2018 - May 2019

- An intensive 24-week long full-stack software development boot camp dedicated to designing, building, and deploying dynamic web applications.
- Final Project:
  - MERN stack scraper and CRUD application that uses React.js UI with bootstrap, Express and Node servers, and a Mongo database hosted on Heroku
  - Google search input API used to find web development cheat sheets and guides

PURDUE UNIVERSITY GLOBAL
Mar 2017

- Bachelor of Science Environmental Policy and Management, 3.78 Cum Laude

WORK EXPERIENCE

VETERANS EXPEDITIONS, SALIDA, CO
Freelance Software Developer, Mar 2019 – Present

- Front-end developer for a 2-person development team in charge of creating a RESTful application that utilizes an Express server, React.js UI, Mongo database, and is hosted on AWS LightSail. Website functionality includes event creation, document uploads, waiver signatures, and donations through PayPal.

OH MY GREEN, DENVER, CO
Happiness Ambassador, Warehouse Associate, Driver, Operations Assistant
Nov 2017 – May 2019

- While conducting warehouse operations and account management services, provided application improvement through physical testing, tracking, and analysis of operational efficiencies and inefficiencies. Helped assist in idea implementation and creation of application development updates for nationally used company applications.

US MARINE CORPS, TWENTYNINE PALMS, CA
Corporal, Combat Engineer, 2010-2014

- Squad leader, responsible for the health and well-being of 4 teams of Marines at all times for the duration assigned to billet. Instructed, demonstrated, and ensured proficiency in all skills and abilities needed for pre-deployment, deployment, and post-deployment operations of a Combat Engineer.

TECHNICAL SKILLS

- JavaScript, jQuery, Handlebars.js, React.js, Express.js, Node.js, MongoDB, HTML5, CSS3, Firebase, MySQL, AJAX, RESTful applications, VS Code, Mocha, Chai, Heroku, and Git
